## PROFILE

I am a passionate individual with a strong interest in web development and cybersecurity. I enjoy learning about how websites are built, and the various technologies involved. The ever-evolving nature of web development excites me, and my goal is to become a skilled full-stack web developer.

## PROJECTS

### Todo-list App
https://github.com/AbdulRehmani2/Todo-List
It is a Todo-list app with mock backend implement using Json-Server package. Context API is used to manage state across the components.

### Weather App
https://abdulrehmani2.github.io/WeatherApp
This is a basic Weather App created using HTML, CSS and Vanilla JavaScript. It uses geolocation API and Open weather API to provide real time results about weather.

### Eduko Website Clone
https://github.com/AbdulRehmani2/eduko-clone
It is a clone for the website eduko.spikotech.com made using React. It uses concepts like React Components, Props and Router to design and link the pages.

### Tik Tac Toe
https://abdulrehmani2.github.io/TicTacToe/
It is a simple Tic Tac Toe game made using HTML, CSS and JavaScript. It allows two players to play and manage all the moves.
